## ABOUT ME

---

Experienced and highly skilled in the art of software development, I am a React, PHP, and Laravel specialist, equipped with a deep passion for creating exceptional web applications and delivering cutting-edge solutions. With a proven track record of successful projects and a broad understanding of the development lifecycle, I bring a wealth of expertise to any team or organization.

As a React developer, I excel at crafting elegant and dynamic user interfaces that provide an intuitive and seamless user experience. My proficiency in React allows me to leverage its powerful features and libraries to build interactive and responsive web applications. I am adept at implementing state management, component-driven development, and utilizing the latest industry best practices to ensure code efficiency and maintainability.

In addition to my React skills, I possess a strong command of PHP and Laravel, two indispensable tools for robust and scalable backend development. Leveraging the power of PHP, I have created and maintained server-side logic that handles complex data processing, database interactions, and third-party integrations. My expertise in Laravel allows me to build secure and efficient RESTful APIs, implement authentication and authorization systems, and develop modular and maintainable code architectures.

With a meticulous approach to problem-solving, I thrive in a collaborative environment where I can contribute my creativity, adaptability, and strong communication skills to drive projects forward. My dedication to producing high-quality code, combined with my ability to quickly learn and master new technologies, ensures that I am always at the forefront of industry trends and best practices.

Having worked on diverse projects across various domains, I possess the versatility to handle both frontend and backend development tasks with equal proficiency. I am adept at working with cross-functional teams, project management methodologies, and version control systems, ensuring smooth collaboration and efficient delivery.

Overall, as a React, PHP, and Laravel software developer, I am committed to delivering exceptional results, leveraging my technical expertise and passion for crafting elegant and efficient solutions. I am ready to bring my skills and experience to contribute to the success of your organization while continuously expanding my knowledge in the ever-evolving world of software development.

## WORK EXPERIENCE

---

### Associate Fullstack Web Developer

**Fenisaas Technologies** [ 05/01/2024 – Current ]

**City:** Ibadan | **Website:** [www.fenisaas.com](http://www.fenisaas.com) | **Name of unit or department:** Software Development -  
**Business or sector:** Information and communication

In my role as an associate full stack developer, I contributed to the development of a financial web and mobile application similar to a bank. This involved working with various service providers and integrating functionalities such as bill payments, purchases, and payments to other banks. Additionally, I was involved in a variety of projects that required creating and consuming APIs, as well as working on user interface design and other related tasks.

Key Responsibilities and Achievements:

- Developed and maintained a financial web and mobile application with features similar to a bank.
- Integrated third-party services for bill payments, purchases, and payments to other banks, ensuring seamless functionality.
- Created and consumed APIs to enable communication between different parts of the application and external services.
- Collaborated with team members to design and implement user interfaces that were intuitive and user-friendly.
- Conducted testing and debugging to ensure the application's functionality and performance met requirements.
- Engaged in continuous learning and improvement to stay updated with the latest technologies and best practices in full stack development.

Overall, my role as an associate full stack developer involved working on a range of projects that required a diverse skill set, including backend development, API integration, and user interface design, to deliver high-quality solutions to our clients.

### Fullstack Developer

**Intrinsic Globe** [ 15/02/2021 – 31/05/2021 ]

**City:** Lagos | **Country:** Nigeria

In my role as a full-stack developer at KING'S, I spearheaded the development of a web application using Next.js for the frontend and Laravel APIs for the backend. This application served as an online community tailored for brand and business owners, providing them with a platform to showcase their ventures.

Key Responsibilities and Achievements:

- Developed a fully responsive user interface in collaboration with the User Interface designer, utilizing HTML, CSS, and JavaScript.
- Designed and implemented the backend logic and database management using Laravel and MySQL, respectively, ensuring seamless integration and optimal performance.
- Designed the software application's architecture with a focus on maintainability, flexibility, and scalability.
- Conducted rigorous testing and debugging to ensure the application's optimal functionality and performance.
- Implemented robust security measures, including user authentication and authorization, input validation, and secure data storage, to protect against potential vulnerabilities.

- Integrated third-party services such as the Flutterwave payment gateway for receiving payments and Cloudinary for managing assets within the web application.

Overall, my efforts contributed to the successful development and deployment of a feature-rich web application that provided brand and business owners with a powerful platform to showcase their offerings and engage with their audience.

## **Fullstack Developer**

**KING'S** [ 06/2021 – 01/2022 ]

**City:** Lagos | **Country:** Nigeria | **Website:** [www.knknings.com](http://www.knknings.com)

In my role as a full-stack developer at KING'S, I was responsible for creating a web application that functioned as an online community specifically designed for brand and business owners. This platform allowed business owners to showcase their ventures by uploading essential information such as business name, logo, portfolio, and contact details. Additionally, it facilitated the receipt of valuable feedback and reviews from clients. The comprehensive details provided by the business owners were made accessible to all individuals visiting the website

- Collaborating closely with the User Interface designer, I undertook the responsibility of implementing fully responsive User Interfaces. The technologies employed for this task included HTML, CSS, and Javascript.
- Taking charge of backend development and database management, I developed the server-side logic and ensured seamless integration of the database within the application. For this purpose, I utilized technologies such as Laravel for backend development and MySQL for database management.
- As a full-stack developer, I assumed the role of designing the software application's architecture. My aim was to create an architecture that embraced maintainable solutions, enabling the application to possess flexibility and scalability.
- Conducting comprehensive testing and debugging procedures, I diligently evaluated the application's performance to ensure optimal functionality and identify and resolve any issues that arose.
- Prioritizing security, I implemented robust measures to safeguard the application against potential vulnerabilities. This included implementing user authentication and authorization protocols, performing input validation, and ensuring secure data storage.

Third party integrations into this application includes the flutterwave payment gateway to receive payments, and cloudinary to manage the assets on the web application

## **Software Developer [Internship]**

**The Information Technology Unit, College of Medicine, University of Ibadan.** [ 17/06/2019 – 27/12/2019 ]

**City:** Ibadan | **Country:** Nigeria

As an Intern in the Information Technology Unit, College of Medicine, University of Ibadan, I worked on the

development and implementation of a new interface for the university website which facilitated to improve the user experience of the website. While working on this project, my duties included:

- **Coding and Programming:** I used technologies such as HTML, CSS Javascript and Bootstrap in the development process

- Software Testing and Quality Assurance: I performed testing operations to identify defects, and I worked closely with the development team to resolve such issues
- Collaboration and Communication: I collaborated with the team of designers, and developers to ensure the the project requirement is properly understood and translated into its technical specification

## EDUCATION AND TRAINING

---

### Bachelor of Engineering

**Federal University of Technology, Akure** [ 11/2015 – 10/2021 ]

City: Akure | Country: Nigeria | Website: <https://www.futa.edu.ng/> | Field(s) of study: Computer Engineering | Final grade: Second Class Upper (3.52 / 5.0)

## DIGITAL SKILLS

---

HTML HTML 5 / CSS / JAVASCRIPT / PHP / REACTJS / NEXTJS / LARAVEL / MYSQL

## SOCIAL AND POLITICAL ACTIVITIES

---

[ 02/2017 – 02/2021 ] The Great Shepherd Area, Redeem Christian Church, Akure Ondo State

**Theatre Department Manager** As the Theater Department Manager, I was responsible for:
